Research Projects

Research Domain :User Experience BTECH- Information Technology

Exploring the usability of DUT students with disabilities in the use of Learning Management System tools.

This research project is for B TECH -Information Technology , This study seeks to explore the user experience of students living with disabilities with the focus of usability . The research will focus on the opinions of students in order to identify flaws ,limitations and recommendations for learning management systems so that it can be inclusive to students living with disabilities ,Furthermore more assisting them achieve the same learning outcomes as other students.

Volunteer Work

Organisation:Varsity Genie

Year :2019

My passion for software development has also pushed and motivated me to inspire others through assisting 2nd and 3rd year students at my university through conducting programming master classes every Saturday and during my spare time.
